

Summary of Your Flood Report

A Service of myFloodZone.com

We have determined that your home or property is located in Zone "X".

These areas have been identified in the community Flood Insurance Studies as areas of moderate or minimal hazard from the principal source flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local storm water drainage systems are not normally considered in the communities FIS. The failure of a local drainage system creates areas of high flood risk within these rate zones. Flood insurance is available in participating communities. (Zone "X" is used on new and revised maps in place of Zones B and C.) It is important to point out that your home or property may be located within 1000 feet of a FEMA designated SFHA (Special Flood Hazard Area). (Please see map if provided) *See the included Glossary and FAQ's for more information.

Thank you for using eFlood
